

# **Annual Report and Action Plan**

Company Name: ITW Proline

Trading As:

ABN: 6004235063

# **About APCO**

Australian Packaging Covenant Organisation (APCO) is a co-regulatory not-for-profit organisation leading the development of a circular economy for packaging in Australia. APCO's vision is a packaging value chain that collaborates to keep packaging materials out of landfill and retains the maximum value of the materials, energy and labour within the local economy.

Each year, APCO Brand Owner Members are required to submit an APCO Annual Report and an APCO Action Plan. This document is the Annual Report and Action Plan output for the organisation listed above. This document provides the overall performance level of the organisation, as well as any commitments they have made to work towards on their packaging sustainability journey. This document may also include additional information provided by the Member in their report.

# **Overall Performance Good Progress**

The chart below indicates the overall performance level of this organisation listed above in the 2023 APCO Annual Report. The organisation's reporting period was January, 2022 - December, 2022

Getting Started	2 Good Progress	3 Advanced	4 Leading	5 Beyond Best Practice

#### **Understanding APCO Annual Reporting performance levels:**

**Getting Started**: You are at the start of your packaging sustainability journey.

You have made some first steps on your packaging sustainability

journey.

You have taken tangible action on your packaging sustainability

Advanced:

journey.

You have made significant progress on your packaging

Leading:

sustainability journey.

Beyond Best Practice:

You have received the highest performance level and have made significant progress on your packaging sustainability journey.

#### **Additional Information**

The information below indicates additional information that the organisation included in their APCO Annual Report.

Describe initiatives, processes or practices that you have implemented during your chosen reporting period that have improved packaging sustainability

Started to implement a templlate across the consumer division a excel spreadsheet requesting packaging specifications and material composition from our suppliers to better understand the recycleability of the packaging we are sourcing prior to generating PREP reports. This creates a deeper understanding of the material we are sourcing and challenging our suppliers to provide better sustainable and recycle solutions at time of product development.

Describe any opportunities or constraints that affected performance within your chosen reporting period

Major customer had requested 111 product lines in the ZENITH Bolts category to be packed into soft plastic packaging LDPE-4. Managed to convince the customer that moving to recyclable cardboard box style packaging without any soft plastic material was a better alternative from both price and environmental perspective.

Please use the space below to provide examples or case studies of exemplary packaging sustainability conducted by your organisation.

Actively removed soft plastic packaging and plastic security collars from 204 product lines in the ZENITH Bolts category. This was achieved by improving the locking tabs on the cardboard boxes to be more secure thus no longer needing a plastic security collar to be produced to hold the packaging together. The hexagonal nuts that are packed into the boxes had been packed into small LDPE-4 Soft Plastic bags. The plastic packaging was removed completely while still all;owing for the hexagonal nuts to be secured into the better lockable pack.

#### **APCO Action Plan Commitments**

For each of the Packaging Sustainability Framework criteria listed below, a description is provided along with the commitments made by the organisation in their APCO Action Plan.

#### Criteria 1:

# Governance & Strategy:

This criteria considers actions to integrate packaging sustainability into business strategies.

- Develop a strategy that includes goals (objectives) and targets for packaging sustainability that addresses the Sustainable Packaging Guidelines (SPGs) or equivalent.
- Include a commitment to achieving the 2025 National Packaging Targets in our strategy.
- Regularly communicate and promote packaging sustainability objectives and targets within our

# **Annual Report and Action Plan**

organisation.

 Regularly engage or communicate with our external stakeholders about the environmental impacts of our packaging.

Criteria 2:

#### **Design & Procurement:**

This criteria considers actions taken to ensure that sustainability principles are considered in the design or procurement of both new and existing packaging through use of the Sustainable Packaging Guidelines (SPGs).

- Review 20% of our packaging against the Sustainable Packaging Guidelines (or equivalent).
- Incorporate the Sustainable Packaging Guidelines (or equivalent) into procurement processes.
- Consider the following Sustainable Packaging Principles in our packaging reviews:
  - Design to reduce product waste
  - Use of renewable materials
  - Use recycled materials
  - Design to minimise litter
  - Provide consumer information on environmental sustainability
- 7% of our packaging to be optimised for material efficiency.
- Improve the accuracy of our data regarding packaging material efficiency.

Criteria 3:

# **Recycled Content:**

This criteria considers actions taken to increase or optimise the amount of recycled material used by your organisation.

- Develop a policy or procedure to buy products and/or packaging made from recycled materials.
- Use recycled content in:
  - Primary packaging that we use to sell our products
  - Secondary packaging that we use to sell our products
- 6% of our packaging to be made using some level of recycled material

Criteria 4:

### Recoverability:

This criteria considers actions taken to improve the recovery of packaging at end-of-life and increase use of reusable packaging.

- 90% of our packaging to be designed to have all packaging components be recoverable at end-of-life.
- Improve the accuracy of our data regarding recoverability.
- Use PREP to assess the recyclability of our packaging through kerbside collection in Australia and/or New Zealand.

#### Criteria 5:

### Disposal Labelling:

2023

This criteria considers the extent to which packaging has been labelled to help consumers determine what to do with packaging at end-of-life.

- 20% of our packaging to have on-pack labelling to inform correct disposal.
- Improve the accuracy of our data regarding labelling.

#### Criteria 6:

#### **On-site Waste:**

This criteria considers progress in increasing the amount of on-site solid waste being diverted from landfill.

- Have recycling programs for the following materials:
  - Paper/cardboard
  - Glass 0
  - Metals
- Aim for 65% of our on-site waste to be diverted from landfill.
- Improve the accuracy of our data regarding on-site waste.

#### Criteria 7:

# **Problematic Materials:**

This criteria considers the extent to which organisations are actively phasing out problematic and unnecessary single-use plastic packaging and preventing/reducing litter.

- Help reduce litter by:
  - Delivering a litter education campaign
- Phase-out the following problematic and unnecessary single-use plastic items:
